Support from Businesses, Colleges & Universities

Free college credits while still in high school

Career Related Internships Opportunities

What's a Career Academy?

A Career Academy is a small learning community within a large comprehensive high school. In Career Academies, students learn in smaller groups that help build multi-year relationships with teachers and other students. Specialized classes teach the skills that students need to succeed in college and career. Students can earn income while getting valuable job experience through their internships and summer jobs. Career Academy students go to college more often than other students.

**Solid Academics,
Employability and
Career Skills...
That's What Career
Academies are all
About.**

The academy is a smaller learning community that focuses on a career theme and is integrated into students' studies including their core curriculum courses. Each year the same group (cohort) of academy students takes a Career and Technical Education course aligned with the career theme, as well as one or more core classes together.

Each academy student participates in several work-based learning activities such as job shadowing, career fairs, career themed industry tours and an internship. Academy students are prepared to participate in these experiences through their cohort academy courses. Each academy student is required to do an internship between the junior and senior year that relates to the academy theme.
